Independent auditor's report on review of condensed consolidated interim financial statements

To the Shareholders of The National Shipping Company of Saudi Arabia

Introduction

We have reviewed the accompanying 31 December 2019 condensed consolidated interim financial statements of The National Shipping Company of Saudi Arabia ("the Company") and its subsidiaries ("the Group") which comprises:

- the condensed consolidated statement of financial position as at 31 December 2019;
- the condensed consolidated statement of profit or loss for the three-month period and year ended 31 December 2019;
- the condensed consolidated statement of comprehensive income for the three-month period and year ended 31 December 2019;
- the condensed consolidated statement of changes in equity for the year ended 31 December 2019;
- the condensed consolidated statement of cash flows for the year ended 31 December 2019; and
- the notes to the condensed consolidated interim financial statements.

Management is responsible for the preparation and presentation of these condensed consolidated interim financial statements in accordance with IAS 34, 'Interim Financial Reporting' that is endorsed in the Kingdom of Saudi Arabia. Our responsibility is to express a conclusion on these condensed consolidated interim financial statements based on our review.

Scope of review

We conducted our review in accordance with the International Standard on Review Engagements 2410, 'Review of Interim Financial Information Performed by the Independent Auditor of the Entity' that is endorsed in the Kingdom of Saudi Arabia. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing that are endorsed in the Kingdom of Saudi Arabia, and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Independent auditor's report on review of condensed consolidated interim financial statements

To the Shareholders of The National Shipping Company of Saudi Arabia (continued)

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying 31 December 2019 condensed consolidated interim financial statements of The National Shipping Company of Saudi Arabia and its subsidiaries are not prepared, in all material respects, in accordance with IAS 34, 'Interim Financial Reporting' that is endorsed in the Kingdom of Saudi Arabia.

The National Shipping Company of Saudi Arabia (Dubai Branch)	JLT-65807	06/12/2010	Dubai DMCC

Group's Fleet:

As at 31 December 2019, the Group owns 89 vessels (31 December 2018: 92 vessels) operating in various sectors as the following:

Crude oil transportation sector: Consists of 48 vessels (31 December 2018: 50 vessels) out of which 42 very large crude carriers (VLCCs) are operating in the spot market, while one VLCC is chartered to ARAMCO Trading Company. The Group also owns 5 product tankers all of which are also chartered to ARAMCO Trading Company.

Chemicals transportation sector: This sector is fully operated by NCC, and it owns 30 vessels, (31 December 2018: 31 vessels) distributed as follows:

- 18 tankers that operate in the spot market.
- 7 tankers are chartered to the International Shipping and Transportation Co. Ltd., a subsidiary of Saudi Basic Industries Corporation (“SABIC”), and 5 tankers are chartered to ARAMCO.

Logistics sector: This sector consists of 6 RoCon vessels (31 December 2018: 6 vessels) operating on commercial lines between North America, Europe, Middle East and the Indian Subcontinent.

Dry bulk transportation sector: This sector is fully operated by BDB, and it owns 5 vessels (31 December 2018: 5 vessels) specialized in transporting dry bulk cargo, all of which are chartered to the Arabian Agricultural Services Company (ARASCO).

2. BASIS OF PREPARATION

2.1. Statement of Compliance

These Condensed Consolidated Interim Financial Statements have been prepared in accordance with IAS 34 condensed interim financial reporting that is endorsed in Kingdom of Saudi Arabia and other standards and pronouncements that are issued by Saudi Organization for Certified Public Accountants (“SOCPA”) and should be read in conjunction with the Group’s last annual Consolidated Financial Statements as at and for the year ended 31 December 2018 (“last annual Financial Statements”). It does not include all of the information required for a complete set of IFRS Financial Statements however, accounting policies and selected explanatory notes are included to explain events and transactions that are significant to an understanding of the changes in the Group’s financial position and performance since the last annual Financial Statements.

2. BASIS OF PREPARATION (continued)

2.2. Preparation of financial statements

(i) Historical cost convention

The condensed consolidated interim financial statements have been prepared on a historical cost basis, except for:

- Derivative financial instruments are measured at fair value.
- The defined benefit plans are recognized at the present value of future obligations using the Projected Unit Credit Method.

(ii) Functional and presentation currency

These condensed consolidated interim financial statements are presented in Saudi Riyal ("SAR"), which is the Company's functional and presentation currency. All amounts have been rounded to the nearest thousand, unless otherwise indicated.

3. BASIS OF CONSOLIDATION

The Company and its subsidiaries are collectively referred to as the "Group". Subsidiaries are entities controlled by the Group.

Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if, and only if, the Group has:

- Power over the investee (i.e., existing rights that give it the current ability to direct the relevant activities of the investee);
- Exposure, or rights, to variable returns from its involvement in the investee;
- The ability to use its power over the investee to affect its returns.

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the period are included in these condensed consolidated interim financial statements from the date the Group gains control until the date the Group ceases to control the subsidiary.
Profit or loss and each component of other comprehensive income (OCI) are attributed to the equity holders of the Parent Company and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance.
When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies in line with the Group's accounting policies. All intra-group assets and liabilities, unrealised income and expenses and cash flows relating to transactions are eliminated in full on consolidation.
Non-controlling interest are measured at their proportionate share of the acquiree's identifiable net assets at the date of acquisition with fair value.

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction.

If the Group loses control over a subsidiary, it:

- De-recognizes the assets (including goodwill) and liabilities of the subsidiary;
- De-recognizes the carrying amount of any non-controlling interest;
- De-recognizes the cumulative translation differences, recorded in equity;
- Recognizes the fair value of the consideration received;
- Recognizes the fair value of any investment retained;
- Recognizes any surplus or deficit in the condensed consolidated statement of profit or loss;

Reclassifies the Group's share of components previously recognized in condensed consolidated statement of other comprehensive income to condensed consolidated statement of profit or loss or retained earnings, as appropriate, as would be required if the Group had directly disposed of the related assets or liabilities.

The Company and its subsidiaries have the same reporting periods except Petredec limited (equity accounted investees) as explained in note 1.

4. SIGNIFICANT ACCOUNTING POLICIES

4.1. Changes in significant accounting policies

Except for the changes below, the Group has consistently applied the accounting policies to all periods presented in these condensed consolidated interim financial statements.
The Group applied IFRS 16 with a date of initial application of 1 January 2019 using the modified retrospective approach. The details of the changes in accounting policies are disclosed below.

A. Definition of a lease

Previously, the Group determined at contract inception whether an arrangement is or contains a lease under IFRIC 4. Under IFRS 16, the Group assesses whether a contract is or contains a lease based on the definition of a lease, as explained in Note 4.11.
On transition to IFRS 16, the Group elected to apply the practical expedient to grandfather the assessment of which transactions are leases. It applied IFRS 16 only to contracts that were previously identified as leases. Contracts that were not identified as leases under IAS 17 and IFRIC 4 were not reassessed for whether there is a lease. Therefore, the definition of a lease under IFRS 16 was applied only to contracts entered into or changed on or after 1 January 2019.

B. As a lessee

As a lessee, the Group previously classified leases as operating or finance leases based on its assessment of whether the lease transferred significantly all of the risks and rewards incidental to ownership of the underlying asset to the Group. Under IFRS 16, the Group recognises right-of-use assets and lease liabilities for most leases – i.e. these leases are on statement of financial position

The Group used a number of practical expedients when applying IFRS 16 to leases previously classified as operating leases under IAS 17. In particular, the Group:
• did not recognise right-of-use assets and liabilities for leases for which the lease term ends within 12 months of the date of initial application;
• did not recognise right-of-use assets and liabilities for leases of low value assets; and
• used hindsight when determining the lease term.
For leases of other assets, which were classified as operating under IAS 17, the Group recognised right-of-use assets and lease liabilities.
Under IFRS 16 at transition, lease liabilities were measured at the present value of the remaining lease payments, discounted at the Group’s incremental borrowing rate as at 1 January 2019. Right-of-use assets are measured at an amount equal to the lease liability, adjusted by the amount of any prepaid or accrued lease payments – the Group applied this approach to all other leases.

Leases classified as operating leases under IAS 17

Assets held under other leases were classified as operating leases and were not recognised in the Group’s statement of financial position. Payments made under operating leases were recognised in profit or loss on a straight-line basis over the term of the lease. Lease incentives received were recognised as an integral part of the total lease expense, over the term of the lease.

C. As a lessor

The Group is not required to make any adjustments on transition to IFRS 16 for leases in which it acts as a lessor, except for a sub-lease.
Under IFRS 16, the Group is required to assess the classification of a sub-lease with reference to the right-of-use asset, not the underlying asset. The Group does not have any sub lease assets.

4. SIGNIFICANT ACCOUNTING POLICIES (continued)

4.1. Changes in significant accounting policies (continued)

D. Impact on financial statements

When measuring lease liabilities, the Group discounted lease payments using its incremental borrowing rate at 1 January 2019.The weighted average rate applied is 4.95%. The impact of transition is summarized below:

Assets:	**SAR'000**
Right of Use Assets	**40,477**
Prepayments and Other Assets	**(3,153)**
Total Impact on Assets:	**37,324**
Liabilities:	
Lease Liabilities	**(37,324)**
Total Impact on Labilities:	**(37,324)**
Equity	
Total Impact on Equity:	**-**

4.2. Significant accounting judgments, estimates and assumptions

The preparation of financial statements requires management to make judgments, estimates, and assumptions that affect the application of policies and the reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the result of which form the basis of making the judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Therefore, actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revision to accounting estimates are recognized in the period in which the estimates are revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

In the process of applying the Group's accounting policies, management has made the following estimates and judgments, which are significant to the financial statements:

- Determining the estimated residual values, impairment and useful lives of property and equipment
- Lease classification as lessor
- Leases: whether an arrangement contains a lease
- Measurement of defined benefit obligations, Key actuarial assumptions
- Investments in equity accounted investees: whether Group has significant influence over investees
- Measurement of ECL allowance for trade receivables and contract assets: key assumption in determining the weighted average loss rate

4. SIGNIFICANT ACCOUNTING POLICIES (continued)

4.3. Revenue from Contracts with Customers

The Group recognises revenue from contracts with customers based on a five-step model as set out in IFRS 15 and is given below:

Step 1 – Identify the contract(s) with a customer: A contract is defined as an agreement between two or more parties that creates enforceable rights and obligations and sets out the criteria for every contract that must be met;
Step 2 – Identify the performance obligations in the contract: A performance obligation is a promise in a contract with a customer to transfer a good or service to the customer;
Step 3 – Determine the transaction price: The transaction price is the amount of consideration to which the Group expects to be entitled in exchange for transferring promised goods or services to a customer, excluding amounts collected on behalf of third parties;
Step 4 – Allocate the transaction price to the performance obligations in the contract: For a contract that has more than one performance obligation, the Group allocates the transaction price to each performance obligation in an amount that depicts the amount of consideration to which the Group expects to be entitled in exchange for satisfying each performance obligation.
Step 5 – Recognize revenue when (or as) the entity satisfies a performance obligation.

The Group satisfies a performance obligation and recognises revenue over time, if one of the following criteria is met:
-The Group's performance does not create an asset with an alternate use to the Group and the Group has an enforceable right to payment for performance completed to date;
-The Group's performance creates or enhances as asset that the customer controls as the asset is created or enhanced;
-The customer simultaneously receives and consumes the benefits provided by the Group's performance as the Group performs

For performance obligations where none of the above conditions are met, revenue is recognised at the point in time at which the performance obligation is satisfied

Revenue is recognised when a customer obtains control of the services. Determining the timing of the transfer of control – at a point in time or over time – requires judgement.

Type of service	Nature, timing of satisfaction of performance obligations, significant payment terms
Time Charter arrangement	In case of time charter arrangement, the Group measures its progress towards complete satisfaction of the performance obligation using a time-based measure. Further, because the Group bills a fixed amount for each day of service provided, the Group has a right to invoice the customer in the amount that corresponds directly with the value of the Group's performance completed to date. Revenue is recognized based on percentage of completion.
Voyage charter	In case of voyage charter arrangement including liner, the Group measures the progress based on number of days elapsed as compared to total number of days expected in a voyage for each contract. Further, the duration of contract executed for each voyage is generally less than year. Revenue is recognised based on percentage of completion.
Logistics revenue	Logistics revenue excluding liner primarily comprises order fulfilment and transportation services. Logistics revenue is recognised at the point in time when the services are rendered to the customer and the customer acknowledges the same.

4. SIGNIFICANT ACCOUNTING POLICIES (continued)

4.3. Revenue from Contracts with Customers (continued)

Principles of IFRS 15 are applied by identifying each specified distinct goods or services promised to the customer in the contract and evaluating whether the entity under the consideration obtains control of the specified good or service before it is transferred to the customer. This assessment requires judgement based on specific facts and circumstances. Further, the Group applies output method (i.e. based on number of days elapsed as compared to total number of days in each voyage for a contract) to measure the progress of revenue.

In certain revenue arrangement, the Group is entitled to certain kind of variable benefits or obliged to pay for certain obligations (variable or conditional in nature). While determining the transaction price, the management applies judgement in estimating the variable consideration and in constraining the same.

4.4. Financial Instruments

i- Recognition and initial measurement

Trade receivables issued are initially recognised when they are originated. All other financial assets and financial liabilities are initially recognised when the Group becomes a party to the contractual provisions of the instrument.

A financial asset (unless it is a trade receivable without a significant financing component) or financial liability is initially measured at fair value plus, for an item not at FVTPL, transaction costs that are directly attributable to its acquisition or issue. A trade receivable without a significant financing component is initially measured at the transaction price.

ii- Classification and measurement of financial assets and financial liabilities

On initial recognition, a financial asset is classified as measured at: amortised cost; FVOCI – debt investment; FVOCI – equity investment; or FVTPL. The classification of financial assets under IFRS 9 is generally based on the business model in which a financial asset is managed and its contractual cash flow characteristics.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A debt investment is measured at FVOCI if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

On initial recognition of an equity investment that is not held for trading, the Group may irrevocably elect to present subsequent changes in the investment's fair value in OCI. This election is made on an investment-by-investment basis.

All financial assets not classified as measured at amortised cost or FVOCI as described above are measured at FVTPL. This includes all derivative financial assets. On initial recognition, the Group may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

4. SIGNIFICANT ACCOUNTING POLICIES (continued)

4.4. Financial Instruments (continued)

ii- Classification and measurement of financial assets and financial liabilities (continued)

The following accounting policies apply to the subsequent measurement of financial assets.

Financial assets at Fair Value Through Profit and Loss (FVTPL)	These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognised in profit or loss.
Financial assets at amortised cost	These assets are subsequently measured at amortised cost using the effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognised in profit or loss. Any gain or loss on derecognition is recognized in profit or loss.
Debt investments at Fair Value through Other Comprehensive Income (FVOCI)	These assets are subsequently measured at fair value. Interest income calculated using the effective interest method, foreign exchange gains and losses and impairment are recognised in profit or loss. Other net gains and losses are recognised in OCI. On derecognition, gains and losses accumulated in OCI are reclassified to profit or loss.
Equity investments at Fair Value through Other Comprehensive Income (FVOCI)	These assets are subsequently measured at fair value. Dividends are recognised as income in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognised in OCI and are never reclassified to profit or loss.

'The financial assets at amortised cost consist of trade receivables, contract assets and cash and cash equivalents.

Financial Liabilities – Classification, subsequent measurement and gain and losses

Financial liabilities are classified as measured at amortised cost or FVTPL. A financial liability is classified as FVTPL if it is classified as held-for-trading, it is a derivative or designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognised in profit or loss. Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gain and losses are recognised in profit or loss. Any gain or loss on derecognition is also recognised in profit or loss.

Derecognition

Financial assets

The Group derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Group neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

The Group enters into transactions whereby it transfers assets recognised in its statement of financial position, but retains either all or substantially all of the risks and rewards of the transferred assets. In these cases, the transferred assets are not derecognised.

Financial liabilities

The Group derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire. The Group also derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognised at fair value.

Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Group currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

On derecognition of a financial liability, the difference between the carrying amount extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognised in profit or loss.

4. SIGNIFICANT ACCOUNTING POLICIES (continued)

4.4. Financial Instruments (continued)

Impairment of non-derivative financial assets

The Group recognises loss allowances for ECLs on financial assets measured at amortised cost and contract assets. The Group measures loss allowances at an amount equal to lifetime ECLs.

Under IFRS 9, loss allowances are measured on either of the following bases:
- 12-month ECLs: these are ECLs that result from possible default events within the 12 months after the reporting date; and

- lifetime ECLs: these are ECLs that result from all possible default events over the expected life of a financial instrument.
When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Group considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Group's historical experience and informed credit assessment and including forward-looking information.

The Group assumes that the credit risk on a financial asset has increased significantly if it is more than 365 days past due from government and 180 days past due from commercial.

The Group considers a financial asset to be in default when:

– the debtor is unlikely to pay its credit obligations to the Group in full, without recourse by the Group to actions such as realising security (if any is held); or

– the financial asset is past due as per terms of agreement with customers.

Measurement of ECLs

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Group expects to receive). ECLs are discounted at the effective interest rate of the financial asset.

Credit-impaired financial assets

At each reporting date, the Group assesses whether financial assets carried at amortised cost and debt securities at FVOCI are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.
Evidence that a financial asset is credit-impaired includes the following observable data:
— significant financial difficulty of the debtor;
— a breach of contract such as a default or being more than 180 days past due;
— the restructuring of a loan or advance by the Group on terms that the Group would not consider otherwise;
— it is probable that the debtor will enter bankruptcy or other financial reorganisation; or
— the disappearance of an active market for a security because of financial difficulties.

Presentation of impairment

Allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets. Impairment losses related to trade and other receivables, including contract assets and finance lease receivables, are presented separately in the statement of profit or loss.
For debt securities at FVOCI, the loss allowance is charged to profit or loss and is recognised in OCI.

4.5. Cash and cash equivalents

Cash and cash equivalents in the condensed consolidated statement of financial position comprise cash at banks, short-term deposits, and murabaha with original maturity of three months or less, which are subject to an insignificant risk of changes in value. Restricted cash and cash equivalents that are not available for use are excluded from cash and cash equivalents for the purposes of the condensed consolidated statement of cash flows.

4. SIGNIFICANT ACCOUNTING POLICIES (continued)

4.6. Inventories

Inventories are measured at the lower of cost or net realizable value. Cost of the used inventories are measured by using the First-in-First-out method including bunker inventory. Vessels spare parts and other consumables are charged to expenses on purchase.

Cost includes the net purchase price (after trade discounts) and any shipping, transportation, insurance, custom duties and other direct expenses related to the acquisition of the inventory.

4.7. Property and equipment

Property and equipment are stated at cost, net of accumulated depreciation and/or accumulated impairment losses, if any. Such cost includes the cost of replacing parts of the property and equipment and borrowing costs for long-term construction projects (qualified assets) if the recognition criteria are met.

When significant parts of property and equipment are required to be replaced at intervals, the Group recognizes such parts as individual assets with specific useful lives and depreciates them accordingly.

Likewise, when a major inspection is performed, its cost is recognized in the carrying amount of the equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognized in the condensed consolidated statement of profit or loss as incurred.

Depreciation is calculated using the straight-line method to allocate their cost, net of their residual values, over their estimated useful lives as follows:

Property and equipment	Useful lives (in years)
Buildings and improvements	3 to 20
Fleet and equipment	6 to 25
Containers and trailers	5 to 12
Furniture and fixtures	10
Tools and office equipment	4
Motor vehicles	4 to 5
Computers equipment	4 to 6
Containers yard equipment	4 to 10

If an item of property and equipment comprises individual components for which different depreciation methods or rates are appropriate, then each component is depreciated separately. A separate component may either be a physical component or a non-physical component that represents a major inspection or overhaul (such as dry docking of vessels).

For recognition of the Group’s vessels, first dry docking costs are considered as a major component of a vessel which are recorded as a separate asset and depreciated separately. Subsequent dry docking costs are capitalized as a separate asset and depreciated over the years until the next scheduled dry docking. Dry docking assets that are left undepreciated during another dry-docking operation are charged to the condensed consolidated statement of profit or loss during the period in which such operation is commenced.

An item of property and equipment is derecognized upon disposal or when no future economic benefits are expected from its use. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the condensed consolidated statement of profit or loss when the asset is derecognized.
The residual values, useful lives and methods of depreciation of property and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

Spare parts and capitalized machines, meeting the definition of property and equipment, are accounted as per the principles of IAS 16.

4.8. Ships Under construction

Ships under constructions at period end includes certain assets that have been acquired but are not ready for their intended use. These assets are transferred to relevant assets categories and are depreciated once they are available for their intended use.

4. SIGNIFICANT ACCOUNTING POLICIES (continued)

4.9. Intangible assets

Intangible assets are measured at cost, less accumulated amortization and accumulated impairment losses, if any. Intangible assets are amortized on a straight-line basis over the estimated useful lives. Subsequent expenditure is capitalized only if it is probable that the future economic benefits associated with the expenditure will flow to the Group and amount can be measured reliably. Intangible assets, useful lives and impairment indicators are reviewed at each financial year end and adjusted prospectively, if considered necessary. The useful lives of intangible assets are assessed to be either finite or indefinite. Intangible assets with finite lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The useful life and the amortization method for an intangible asset with a finite useful life are reviewed at least at each financial year-end. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset, are accounted for by changing the useful life or amortization method, as appropriate, and are treated as changes in accounting estimates. The amortization expense on intangible assets with finite life is recognised in the condensed consolidated statement of profit or loss in the expense category consistent with the function of the intangible asset.

4.10. Equity accounted investees

An equity accounted investees is an entity over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.
Under the equity method, an equity accounted investees is initially recognised in the condensed consolidated statement of financial position at cost and adjusted thereafter to recognise the Group's share of the profit or loss and other comprehensive income of the equity accounted investees . When the Group's share of losses of an equity accounted investees exceeds the Group's interest in that an equity accounted investees (which includes any long-term interests that, in substance, form part of the Group's net investment in the equity accounted investees, the Group discontinues recognising its share of further losses. Additional losses are recognised only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the equity accounted investees. If the equity accounted investees subsequently reports profits, the Group resumes recognising its share of those profits only after its share of the profits equals the share of losses not recognised.
An equity accounted investees is accounted for using the equity method from the date on which the investee becomes an associate. On acquisition of the equity accounted investees , any excess of the cost of the investment over the Group's share of the net fair value of the identifiable assets and liabilities of the investee is recognised as goodwill, which is included within the carrying amount of the investment. Any excess of the Group's share of the net fair value of associate's identifiable assets and liabilities over the cost of the investment, after reassessment, is recognised immediately in condensed consolidated Statement of profit or loss in the period in which the investment is acquired.
When a Group entity transacts with an equity accounted investees of the Group, profits or losses resulting from the transactions with the associate are recognised in the Group's condensed consolidated interim financial statements only to the extent of interests in the equity accounted investees that are not related to the Group.

4.11. Leases

The Group has applied IFRS 16 using the modified retrospective approach and therefore the comparative information has not been restated and continues to be reported under IAS 17 and IFRIC 4. The details of accounting policies under IAS 17 and IFRIC 4 are disclosed separately if they are different from those under IFRS 16 and the impact of changes is disclosed in Note 4.1.

Policy applicable from 1 January 2019

At inception of a contract, the Group assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Group assesses whether:

- the contract involves the use of an identified asset – this may be specified explicitly or implicitly, and should be physically distinct or represent substantially all of the capacity of a physically distinct asset. If the supplier has a substantive substitution right, then the asset is not identified;
- the Group has the right to obtain substantially all of the economic benefits from use of the asset throughout the period of use; and

4. SIGNIFICANT ACCOUNTING POLICIES (continued)

4.11. Leases (continued)

Policy applicable from 1 January 2019 (continued)

- the Group has the right to direct the use of the asset. The Group has this right when it has the decision-making rights that are most relevant to changing how and for what purpose the asset is used. In rare cases where the decision about how and for what purpose the asset is used is predetermined, the Group has the right to direct the use of the asset if either:
  - ✓ the Group has the right to operate the asset; or
  - ✓ the Group designed the asset in a way that predetermines how and for what purpose it will be used.
- This policy was applied to contracts entered into, or changed, on or after 1 January 2019.

Policy applicable before 1 January 2019

For contracts entered into before 1 January 2019, the Group determined whether the arrangement was or contained a lease based on the assessment of whether:

- fulfilment of the arrangement was dependent on the use of a specific asset or assets; and
- the arrangement had conveyed a right to use the asset. An arrangement conveyed the right to use the asset if one of the following was met:

• the purchaser had the ability or right to operate the asset while obtaining or controlling more than an insignificant amount of the output;
• the purchaser had the ability or right to control physical access to the asset while obtaining or controlling more than an insignificant amount of the output; or
• facts and circumstances indicated that it was remote that other parties would take more than an insignificant amount of the output, and the price per unit was neither fixed per unit of output nor equal to the current market price per unit of output.

As a lessee

The Group recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The estimated useful lives of right-of-use assets are determined on the same basis as those of property and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Group's incremental borrowing rate. Generally, the Group uses its incremental borrowing rate as the discount rate.

Lease payments included in the measurement of the lease liability comprise the following:

- fixed payments, including in-substance fixed payments;
- variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- amounts expected to be payable under a residual value guarantee; and
- the exercise price under a purchase option that the Group is reasonably certain to exercise, lease payments in an optional renewal period if the Group is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the Group is reasonably certain not to terminate early.

The lease liability is measured at amortised cost using the effective interest method. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the Group's estimate of the amount expected to be payable under a residual value guarantee, or if the Group changes its assessment of whether it will exercise a purchase, extension or termination option.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

4. SIGNIFICANT ACCOUNTING POLICIES (continued)

4.11. Leases (continued)

Short-term leases and leases of low-value assets

The Group has elected not to recognise right-of-use assets and lease liabilities for short-term leases that have a lease term of 12 months or less and leases of low-value assets. The Group recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

Group as a lessor

When the Group acts as a lessor, it determines at lease inception whether each lease is a finance lease or an operating lease. To classify each lease, the Group makes an overall assessment of whether the lease transfers substantially all of the risks and rewards incidental to ownership of the underlying asset. If this is the case, then the lease is a finance lease; if not, then it is an operating lease. As part of this assessment, the Group considers certain indicators such as whether the lease is for the major part of the economic life of the asset.

The Group recognises lease payments received under operating leases as income on a straight- line basis over the lease term.

The accounting policies applicable to the Group as a lessor in the comparative period were not different from IFRS 16.

Gross investment in finance lease include the total of the future lease payments on finance leases (lease receivables), plus estimated residual amounts receivable. The difference between the lease receivables and the cost of the leased asset is recorded as unearned lease finance income and for presentation purposes, is deducted from the gross in the finance leases. Any unguaranteed residual value of the assets is reviewed periodically and any decrease in residual value is recorded immediately.

Initial direct cost incurred by the lessors in negotiating an operating lease are added to the carrying amount of the leased asset and recognized over the lease term on the same basis as the lease income.

4.12. Classification of assets and liabilities to “current” and “non-current”

The Group presents assets and liabilities in the statement of financial position based on current/non-current classification. An asset is current when it is:

- Expected to be realized or intended to be sold or consumed in the normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realized within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in the normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

All other liabilities are classified as non-current.

4.13. Foreign currency transaction

The Group’s condensed consolidated interim financial statements are presented in Saudi Riyals rounded to the nearest thousand, which is also the Parent Company’s functional currency. For each entity, the Group determines the functional currency and items included in the financial statements of each entity are measured using that functional currency.

Transactions in foreign currencies are initially recorded by the Group’s entities at their respective functional currency spot rates at the date the transaction first qualifies for recognition. Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the condensed consolidated interim financial statements reporting date for the Group. All differences arising on settlement or translation of monetary items are taken to the statement of profit or loss with the exception of differences on foreign monetary items that form part of a net investment in a foreign operation. These are recognized in OCI until the disposal of the net investment, at which time they are reclassified to condensed consolidated statement of profit or loss. Tax charges and credits attributable to exchange differences on these monetary items are also recorded in OCI.

4. SIGNIFICANT ACCOUNTING POLICIES (continued)

4.13. Foreign currency transaction (continued)

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate as at the date of the initial transaction and are not subsequently restated. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of a gain or loss on change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognized in OCI or condensed consolidated statement of profit or loss, respectively).

4.14. Foreign currency translation

On consolidation, the assets and liabilities of foreign operations are translated into Saudi Riyal at the rate of exchange prevailing at the reporting date and their statements of profit or loss are translated at exchange rates prevailing at the dates of the transactions. The exchange differences arising on translation for consolidation are recognized in OCI. On disposal of a foreign operation, the component of OCI relating to that particular foreign operation is reclassified to condensed consolidated statement of profit or loss.

4.15. Zakat and Taxes

The Company and its subsidiaries in the Kingdom of Saudi Arabia are subject to regulations issued by the General Authority of Zakat and Tax ("GAZT") in the Kingdom of Saudi Arabia, which is subject to interpretations. Zakat is levied at a fixed rate of 2.5% on the higher of adjusted Zakat profit or the Zakat base. The Management establishes provisions where appropriate on the basis of amounts expected to be paid to the GAZT and periodically evaluates positions taken in the Zakat returns with respect to any Zakat differences. Zakat is charged to the condensed consolidated statement of profit or loss. Additional Zakat liability, if any, related to prior years' assessments arising from GAZT are accounted for in the period in which the final assessments are finalized.

For subsidiaries outside the Kingdom of Saudi Arabia, income tax is provided for in accordance with the regulations applicable in the respective countries and is charged to the condensed consolidated statement of profit or loss. Provision is made for withholding tax on payments to non-resident parties and is charged to the condensed consolidated statement of profit or loss. Moreover, certain shareholders of the Group are subject to income tax, which is recognized as an expense in the condensed consolidated statement of profit or loss.

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in condensed consolidated interim Financial Statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences and unused tax losses can be utilized. Such deferred tax assets and liabilities are not recognized if the temporary difference and unused tax losses arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. In addition, deferred tax liabilities are not recognized if the temporary difference arises from the initial recognition of goodwill.

Deferred tax liabilities are recognized for taxable temporary differences associated with investments in subsidiaries and associates, except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognized to the extent that it is probable that there will be sufficient taxable profits against which to utilize the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered. Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

4. SIGNIFICANT ACCOUNTING POLICIES (continued)

4.16. Borrowing costs

Borrowing costs are directly attributed to the acquisition, construction or production of a qualifying asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of finance and other costs that an entity incurs in connection with the borrowing of funds.

4.17 Impairment of non-financial assets

The Group assesses at each reporting date whether there is an indication that a non-financial asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Group estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or Cash Generating Unit (CGU's)fair value less costs of disposal and its value in use. It is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or Groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.
For assets excluding goodwill, an assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the Group estimates the asset's or CGU's recoverable amount. A previously recognized impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognized. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years.

The following criteria are also applied in assessing impairment of specific assets:

- Goodwill is tested for impairment in the reporting period and when circumstances indicate that the carrying value may be impaired.
- Impairment is determined for goodwill by assessing the recoverable amount of each CGU (or group of CGUs) to which the goodwill relates. Where the recoverable amount of the cash-generating unit is less than their carrying amount, an impairment loss is recognized. Impairment losses relating to goodwill cannot be reversed in future periods.
- Intangible assets with indefinite useful lives are tested for impairment in the reporting period at the CGU level, as appropriate and when circumstances indicate that the carrying value may be impaired.

4.18. Cash dividends to the shareholders

The Group recognizes a liability to make cash distributions to the shareholders when the distribution is authorized and the distribution is no longer at the discretion of the Group. As per the companies regulations of Saudi Arabia, a distribution is authorized when it is approved by the shareholders or when interim dividends are approved by the Board of Directors. A corresponding amount is recognized directly in equity.

4.19. Employees' end of service benefits

The Group sets the assumptions used in determining the key elements of the costs of meeting such future obligations. These assumptions are set after consultation with the Group's actuaries and include those used to determine regular service costs and the financing elements related to the liabilities. The calculation of defined benefit obligation is performed by a qualified actuary using the projected unit credit method.

i. *Short-term employee benefits*
   Short-term employee benefits are expensed as the related service is provided. A liability is recognised for the amount expected to be paid if the Company has a present legal or constructive obligation to pay this amount as a result of the past service provided by the employee and the obligation can be estimated reliably.

4. SIGNIFICANT ACCOUNTING POLICIES (continued)

4.19. Employees' end of service benefits (continued)

ii. Defined benefit plans

Provision is made for amounts payable to employees under the Saudi Labour Law and employee contracts. This liability, which is unfunded, represents the amount payable to each employee on a going concern basis.

The cost of providing benefits is determined using the projected unit credit method as amended by IAS 19.

Remeasurements, comprising of actuarial gains and losses, excluding amounts included in interest on the defined benefit liability are recognised immediately in the statement of financial position with a corresponding debit or credit to retained earnings through OCI in the period in which they occur. Remeasurements are not reclassified to profit or loss in subsequent periods.

Past service costs are recognised in profit or loss on the earlier of:

- The date of the plan amendment or curtailment, and
- The date that the Group recognises related restructuring costs

Interest is calculated by applying the discount rate to the defined benefit liability. The Company recognises the following changes in the defined benefit obligation under 'operating costs', and 'general and administration expenses' in the statement of profit or loss:

- Service costs comprising current service costs, past-service costs, gains and losses on curtailments and non-routine settlements
- interest expense or income

4.20. Provisions

Provisions are recognized when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Where the Group expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the condensed consolidated statement of profit or loss net of any reimbursement.

4.21. Contingent assets and liabilities

Contingent assets are not recognized in the condensed consolidated interim financial statements but are disclosed when an inflow of economic benefits is probable. An assessment is made at each reporting date to recognize contingent liabilities which are probable obligations arising from past events whose existence is confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly under the control of the Group.

4.22. Earnings per share – EPS

The Group determines basic earnings per share by dividing profit or loss attributable to ordinary equity holders (the numerator) by the weighted average number of ordinary shares outstanding (the denominator) during the period. For The weighted average number of ordinary shares outstanding during the period is the number of ordinary shares outstanding at the beginning of the period, adjusted by the number of ordinary shares bought back or issued during the period multiplied by a time-weighting factor. The time-weighting factor is the number of days that the shares are outstanding as a proportion of the total number of days in the period; a reasonable approximation of the weighted average is adequate in many circumstances.
Diluted EPS amounts are calculated by dividing the profit attributable to equity shareholders of the Parent by the weighted average number of equity shares outstanding during the year plus the weighted average number of equity shares that would be issued on conversion of all the dilutive potential equity shares into equity shares.

4.23. Statutory reserve

In accordance with the Saudi Arabian Regulations for Companies, the Group must transfer 10% of the net income in each year to the statutory reserve until it has built a reserve equal to 30% of the share capital. This reserve is not available for distribution to the shareholders of the Company.

4.24 Bunker subsidy

Bunker subsidy is recognized where there is reasonable assurance that the subsidy will be received and all attached conditions will be complied with. When the grant relates to expenses item, it is recognized as income on a systematic basis over the periods that the related costs, for which it is intended to compensate, are expensed. The Group recognizes unconditional subsidy related to bunker purchase in condensed consolidated statement of profit or loss as bunker subsidy income.

4. SIGNIFICANT ACCOUNTING POLICIES (continued)

4.25 Segment reporting

A reporting segment is a component of the Group that engaged in business activities from which it may earn revenues and incur expenses, including revenues and expenses that relate to transactions with any of the Group's other components. All operation segments' operating results are reviewed regularly by the Group's chief operating decision makers about resources to be allocated to the segment and to assess its performance, and for which discrete financial information is available.

The Group is organized into business units based on their operations and has the following reportable segments:

- Transportation of oil
- Transportation of chemicals
- Logistics
- Transportation of dry bulk, and
- Head office and others

The Group's management reviews the above segments for quantitative thresholds as well as criteria for presenting the revenues and expenses for the segments at the end of every reporting period.

4.26 Standards issued but not yet effective

A number of new standards are effective for annual periods beginning after 1 January 2019 and earlier application is permitted; however, the Group has not early adopted the new or amended standards in preparing these condensed consolidated interim financial statements.

The following amended standards and interpretations are not expected to have a significant impact on the Group's condensed consolidated interim financial statements.

- Amendments to References to Conceptual Framework in IFRS Standards.
- Definition of a Business (Amendments to IFRS 3).
- Definition of Material (Amendments to IAS 1 and IAS 8).
- IFRS 17 Insurance Contracts.

5. OPERATING SEGMENTS

The Group has the following four strategic divisions, which are its reportable segments. These divisions offer different services and are managed separately because they have different economic characteristics – such as trends in sales growth, rates of return and level of capital investment – and have different marketing strategies.

a) The following schedule illustrates the Group's activities according to the operating segments for the year ended 31 December :

SAR'000

31 December 2019	Transportation of oil	Transportation of chemicals	Logistics	Transportation of dry bulk	Head office and Others	Total
Revenue	3,959,202	1,105,142	1,069,270	420,053	13,348	6,567,015
Operating cost	(3,160,678)	(945,798)	(918,242)	(354,295)	4,827	(5,374,186)
Bunker subsidy	211,715	12,040	10,413	-	-	234,168
Gross profit	1,010,239	171,384	161,441	65,758	18,175	1,426,997
General and administrative expenses	-	(1,025)	(4,075)	(16,034)	(132,929)	(154,063)
Provision on trade receivables and contract assets	3,248	(20,314)	(58,754)	(3,033)	-	(78,853)
Other income (expenses), net	22,833	(5,317)	794	1,074	9,553	28,937
Finance cost	(260,272)	(62,783)	(24,706)	(30,446)	(85,517)	(463,724)
Share in a result of an equity accounted investees	-	-	-	-	(23,702)	(23,702)
Profit before zakat & taxes	776,048	81,945	74,700	17,319	(214,420)	735,592

The Group's vessels are deployed throughout the world and are not concentrated in certain geographical areas. The Group's management does not consider the geographical distribution of the group's operations to be relevant for their internal management analysis and therefore no geographical segment information has been disclosed.

All operating segment's results are reviewed regularly by the Group's management to make decisions about resources to be allocated to the segment and assess their performance, and for which discrete financial information is available.

5. OPERATING SEGMENTS (continued)

7. SHIPS UNDER CONSTRUCTION

BDB signed contracts on 25 August 2017 with Hyundai Samho Heavy Industries to build four bulk cargo carriers for a total amount of SAR 450 million (USD 120 million). These carriers are expected to be received during the year 2020.

Company signed a contract on 18 September 2019 to build the first VLCC with the International Maritime Industries Company and in cooperation with Hyundai Samho Heavy Industries. The carrier is expected to be received during the year 2021.

Ships under construction as at year ended 31 December 2019 amounted to SAR 289 million for 5 vessels (31 December 2018: SAR 139 million for 4 vessels) and mainly relates to payments made towards construction of these vessels.

8. SUKUK, LONG-TERM LOANS AND SHORT-TERM LOANS

	Note	**31 December 2019 (Unaudited) SAR '000**	31 December 2018 (Audited) SAR'000

		9,528,446	10,196,663

8.1. Sukuk

On 14 Shawwal 1436H (corresponding to 30 July 2015), the Company completed the issuance and offering of local Sukuk denominated in Saudi Riyal for public offering with nominal value amounted to SAR 3,900 million, and a nominal value of SAR 1 million for each Suk. The Sukuk issuance bears a variable rate of return at (SIBOR) plus a predetermined margin, payable semi-annually. The Sukuk is due to mature at par value on its expiry date of 1 Muharram 1444 (corresponding to 30 July 2022).

8.2. Murabaha loans

The Group obtained long term loans during year ended 31 December 2019 for a total of SAR 45 million (31 December 2018: SAR 915 million). Loans are secured by promissory notes and mortgages against vessels (note 6). These loans are repayable over 10 years on quarterly or semi-annual basis. The loans carry commission at normal commercial rates. Balance of loans against which profit to be paid is based on LIBOR as at 31 December 2019 equivalent to SAR 2,555 million (31 December 2018: SAR 3,104 million) and balance of loans against which profit to be paid based on SIBOR at the end of 31 December 2019 totaled to SAR 2,783 million (31 December 2018: SAR 3,040 million). Balance in prepaid financing account related to Murabaha loans at the end of 31 December 2019 is SAR 60 million (31 December 2018: SAR 71 million).

8.3. Commercial loans

The Group did not obtain any long-term loan during year ended 31 December 2019 (31 December 2018: Nil). The existing loans are secured by mortgages against vessels (note 6). This loan is repayable over 10 years on semi-annual basis carrying special commission at LIBOR plus normal commercial margin. Balance of the loan against which profit to be paid based on LIBOR as at 31 December 2019 are SAR 91 million (31 December 2018: SAR 127 million).

8.4. Short Term Loans

The Group obtained short term loans during the year ended 31 December 2019 amounting to SAR 535 million (31 December 2018: SAR 586 million). The total repayment against short term loans during the year ended 31 December 2019 is SAR 371 million (31 December 2018: SAR 490 million). The existing loans were utilized to meet working capital requirements during the year.

8. SUKUK, LONG-TERM LOANS AND SHORT-TERM LOANS

8.5. Covenants

Loans agreements include covenants mainly related to maintaining certain ratios of leverage and debt to equity ratio. Under the terms of these agreements, lenders are entitled to demand immediate repayment of loans if these covenants are not met.

9. EARNINGS PER SHARE

	For the three-month period ended on 31 December 2019	For the three-month period ended on 31 December 2018	**For the year ended on 31 December 2019**	For the year ended on 31 December 2018
	SAR'000	SAR'000	**SAR'000**	SAR'000

11. ZAKAT AND TAXES

The Company's zakat is based on financial statements of the Company and its wholly owned subsidiaries, in accordance with the General Authority of Zakat and Tax ("GAZT') regulations. The Company and its other subsidiaries filed their zakat and tax returns separately.

The Company has filed its zakat returns up to 2018. All the assessment related to the years up to 2017 have been closed with GAZT. GAZT did not close or issue any assessment related to the year 2018. The Company believes that adequate provision has been made against any potential zakat and tax liabilities.

12. DIVIDENDS
